

The Minnesota Science Teachers Education Project (MnSTEP) will present 10 FREE summer science institutes throughout the state for elementary and secondary teachers of science! Meals, stipend, teaching resources, graduate credits from Hamline University, and free MnSTA membership are included.

Plus . . . MnSTEP offers no-cost licensure programs in high school chemistry (ChemCAL) and physics (PhASE) starting this summer at Hamline University.

Recharge your science curriculum! Join your colleagues for a summer of content-rich, teacher-focused, grade-appropriate science professional development.

Detailed information and web registration available at:
